REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record do not anticipate nor do they reasonably suggest the cutting machine as claimed in claims 6, 11, and 12. The closest prior art, Witjes (US 6,148,706) teaches a cutting machine comprising many of the claimed elements as noted in the previous Office Actions. However, Witjes lacks a level adjusting mechanism. In that regard, it appears that Neal (US 1,435,252) teaches a level adjusting mechanism as noted in the last Office Action. Upon reconsideration, it would appear that the teachings of Neal would not apply to Witjes due to the fundamental difference in which the workpiece is handled between the two references. In Witjes, the workpiece is fed in a horizontal manner, i.e. where the thickness of the board is measured vertically. In contrast, the workpiece in Neal is fed vertically, i.e. wherein the thickness of the board is measured horizontally. In other words, the features (D, D) identified by the Examiner in the previous rejection function as a guide as opposed to being a vertically adjustable table that supports the workpiece. Moreover, none of the other prior art of record fairly teach or suggest this lacking feature in Witjes. This applies to all the independent claims. Thus, it is believed that the claimed inventions with the lacking feature in combination with all the other recited elements are deemed to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
